SPECIAL TO WOMEN
The most economical, cleansing and germicidal of all antiseptics is

Paxtine
A soluble Antiseptic Powder to be dissolved in water as needed.

As a medicinal antiseptic for douches in treating catarrh, inflammation or ulceration of nose, throat, and that caused by feminine ills it has no equal. For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been cured say it is "worth its weight in gold." WHAT'S THE REASON.

Many Paris People in Poor Health Without Knowing the Cause.

There are scores of people who drag out a miserable existence without realizing the cause of their suffering. Day after day they are racked with backache and headache; suffer from nervousness, dizziness, weakness, languor and depression. Perhaps the kidneys have fallen behind in their work of filtering the blood and that may be the root of the trouble. Look to your kidneys, assist them in their work—give them the help they need. You can use no more highly recommended remedy than Doan's Kidney Pills—endorsed by people all over the country and by your neighbors in Paris.

Mrs. Hodge is only one of many Ky. says: "I had dizzy and nervous spells and my back and head ached, showing that my kidneys were weak. When I saw Doan's Kidney Pills advertised, I used them and they gave me relief."

Mrs. Hodge is only one of many Paris people who have gratefully endorsed Doan's Kidney Pills. If your back aches—if your kidneys bother you, don't simply ask for a kidney remedy—ask distinctly for Doan's Kidney Pills, the same that Mrs. Hodge had—the remedy backed by home testimony. 50c. all stores. NEW KENTUCKY LINE.

The Ohio State Public Utilities Commission has authorized a \$50,000 stock issue for the Chesapeake & Ohio Northern railway, the proceeds to be used in buying a right-of-way and making a preliminary survey of its proposed line from Edgington, Ky., and Portsmouth, O., to Columbus, paralleling Norfolk & Western railway. It will connect with the C. & O. at Edgington.

GOVERNMENT SENDS EXPERT TO KENTUCKY MOUNTAINS.

Dr. John W. Kerr, Government expert, has been sent by the Public Health Service to inspect the work which the service in conducting in Eastern Kentucky to stamp out trachoma. Three temporary hospitals have been established at Inman and neighboring settlements. A recent survey of a number of mountain counties in Eastern Kentucky showed that 10 per cent of the population in some sections were suffering with trachoma and allied eye troubles.

WOMAN'S AERIAL FEAT.

Lily Irvine, aviator, completed a 70-mile flight from Cedar Point to Euclid Beach in 60 minutes, breaking the record made by Glenn Curtis, and making the longest over-water flight ever made by a woman. Curtis made the trip in 70 minutes in 1910.

HOW CHILDREN GROW

Children grow by nourishment—not overloaded stomachs or rich foods but qualities that are readily converted into life-sustaining blood; too often their digestive powers cannot procure these qualities from ordinary foods which results in weakness, dullness and sickness.

If your children are under-size, underweight, catch cold easily, are languid, backward, pale or frail, give them Scott's Emulsion which is pure medicinal nourishment. It sharpens the appetite, builds healthy flesh, firm muscles and active brains. Scott's is growing-food for children. Refuse alcoholic substitutes.

AGRICULTURAL EXTENSION.

Needs of the Kentucky Live Stock Exchange.

The Live Stock Exchange recently organized by the Extension Department of the Kentucky Agricultural Experiment Station has made a very auspicious beginning at listing stock for sale also at getting in touch with prospective buyers of live stock; however, like every other business worth while, it meets with its difficulties. For example, it has some requests that it has not as yet been able to fill and on the other hand it has some excellent stock listed for which buyers have not been secured as yet. It is surprising, however, in spite of the dry weather and other unfavorable conditions to notice the heavy demand for both grade and pure bred stock.

By way of explanation to those not familiar with the workings of the live stock exchange of the Experiment Station, the following statement might be made. The Extension Department of the Station was organized to devise efficient means of carrying helpful information to farmers, and otherwise operating to improve the condition of the Kentucky farmer. Among the activities engaged in by this department have been the issuing of special press notices, conducting short courses both at the Agricultural College and in various places over the State where the interest is great enough to warrant it, the organization of farmers' and breeders' associations, conducting educational agricultural exhibits at county and other fairs and exhibitions, the conducting of boys' encampments, etc., for agricultural instruction, the installation of county agricultural agents, the organization of boys' and girls' clubs, the organization and systematic instruction of clover and alfalfa clubs, demonstrations in reclamation of worn out soils, itinerant advisory work the rejuvenation of old orchards, spraying and pruning demonstrations and general horticultural improvement work, the building of barns and silos and general dairy improvement work, the introduction of agriculture in schools, and other such enterprises too numerous to mention.

One of the most recent undertakings is the above mentioned live stock exchange which acts as a medium for those who wish to buy and sell. No fees are charged. No responsibility is assumed by this department, as its only effort is to put the prospective buyer and seller in communication, leaving them to make their own trade. This is a service that should interest and help every farmer in the State, but it takes co-operation to make such a thing go. The farmer can help not alone by listing stock or offering to buy, but if he knows of a prospective buyer or seller he should inform this office and likewise the interested party. Farmers have been accused of being indifferent as regards the betterment of farm conditions, but this should not obtain when it comes to an enterprise whose success depends upon the co-operation of the farmers themselves.

Just now we are in great need of a grade Shorthorn or Red Polled bull, several hundred Herford heifers, four grade Percheron mares, twenty calves of beef breeds or grades, a number of pure bred Angus cattle, Southdown and Shropshire sheep and a number of Jersey heifers and cows. On the sale list is a large assortment but none happened to suit the above prospective purchasers. The farmers of Kentucky can make this exchange their most valuable medium or they can make a quick failure of an organization intended to help them.

T. R. BRYANT,
Head of Dept. of Agricultural Extension Kentucky Agricultural Experiment Station.

ABOUT CUTTING TOBACCO

Forty-nine years ago I began growing tobacco. A few years later I decided that there were certain days better than others on which to cut tobacco for it to cure up nicely and have a rich, waxy and heavy body. To find out the way to tell these dates, and to tell them ahead has been a hard job, but I have finally succeeded.

To explain, let me say that tobacco has an oily substance which is its natural possession. It has a sap (water) like other vegetation. When the sap rises, it runs the oil out through the pores of the leaves, on the principle that oil and water won't mix, and oil being the lighter is pushed out by the sap. Tobacco cut and cured in this state will be light and "chaffy" you see, there is nothing but sap in the tobacco and when cured this sap is gone. It evaporates and leaves the tobacco light and worthless. But to cut tobacco when the sap is down and the oil has full sway, you can cure it up nicely and with a heavy body; it will be rich and "waxy." This happens because the tobacco is full of oil instead of sap, and the oil can't evaporate and remains in the leaf to make it rich and heavy.

It has been my experience that we must cut tobacco when there is oil in it, if we expect to have oil in it when cured. For instance, you have experienced cutting one week and have excellent luck and then cut a few days later, probably off the same piece of ground and with riper tobacco, and have no luck at all.

I shall be pleased to answer any correspondence from tobacco growers who want to write me, provided postage is sent for reply.

Yours truly,
D. V. DAVIS, Fork, N. C.

WOMAN HONORED.

Unusual recognition was accorded a woman Friday night by members of the Uniform Rank, Knights of Pythias, assembled for their international biennial encampment in Terre Haute, Ind., when Miss Fisher, private secretary to Major General Arthur P. Stobart, was greeted with a major general's salute.

Just before the salute was fired Miss Fisher, who is known among the Pythians as "Gen." Fisher, listened to a band concert given in her honor by the Ohio brigade. Miss Fisher is the first woman to be honored with a Pythian major general's salute.
